MR. THOMAS G. FARRELL
SUPERINTENDENT

July 2017

Oceanport School District
29 Wolf Hill Avenue
Oceanport, NJ 07757

Dear Oceanport School District Community,

Our school system is committed to protecting student, teacher, and staff health. To protect our community and be in compliance with the new Department of Education regulations, Oceanport School District tested our school's drinking water for lead.

In accordance with these new Department of Education regulations, Oceanport School District will implement immediate remedial measures for any drinking water outlet with a result above the recommended level.

Results of our Testing

Following instructions given in technical guidance developed by the New Jersey Department of Environmental Protection, we completed a plumbing profile for Oceanport School District. Through this effort, we identified and tested all drinking water and food preparation outlets. Of the 50 samples taken, all but 2 tested below the lead action level established by the US Environmental Protection Agency for lead in drinking water. These two areas are now closed off and currently being remediated. We will re-test over the next month and post results.

For More Information

A copy of the test results are posted to the website and available in our Board Office for inspection by the public. For more information about water quality in our schools, contact Dr. Joan Saylor at Oceanport School District, 732-542-0683 ext. 2120.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Farrell", written in a cursive style.

Thomas G. Farrell
